## INSTALLING LOCKS IN PRE-DRILLED DOORS

Having difficulty installing locks in pre-drilled doors?

- Make sure the tongue on the lock is OUT
- Place the barrel into the door
- Put pressure on the snib, pulling it towards you
- Activate the barrel by turning the key
- Put in the cylinder screw

If you are finding it too difficult to keep pressure on the snib, try to release the bottom and top of the tongue and start over.
